AL'AMIN JAGORA DATA SERVICES

Production .env & Credentials Deployment Guide

Step-by-step instructions to configure API keys, payment gateways & cPanel MySQL

CRITICAL SECURITY & HOSTING NOTE

1. For Node.js / AI Studio: Fill in the .env file in the project root directory.
2. For QServers cPanel (PHP): The equivalent configuration file is cpanel-backend/config.php.
3. **Never commit real keys to public GitHub repositories or share them over unsecured chats.**

1. Upstream VTU Provider (ClubKonnect / HusmoData / VTPass)

This provider delivers automated MTN, Airtel, Glo & 9mobile airtime, data and bill payments.

```
CLUBKONNECT_USER_ID=CK10982348
CLUBKONNECT_API_KEY=94827103847291048291038472910482
CLUBKONNECT_BASE_URL=https://www.clubkonnect.com/API
VTU_PROVIDER_API_KEY=your_backup_provider_key_here
VTU_PROVIDER_BASE_URL=https://husmodata.com/api
```

How to obtain ClubKonnect credentials:

Step A: Visit https://www.clubkonnect.com and register or login to your account.
Step B: Go to Developer API or Integration settings on your dashboard.
Step C: Copy your User ID (e.g. CK100...) and paste into CLUBKONNECT_USER_ID.
Step D: Generate or copy your API Key and paste into CLUBKONNECT_API_KEY.
Step E: Fund your ClubKonnect wallet so automated API airtime/data purchases succeed.

2. Automated Bank Virtual Accounts (Monnify & PayVessel)

Enables automated Wema, Sterling & Fidelity accounts for instant wallet funding.

```
MONNIFY_API_KEY=MNFY_1098234871920384729104
MONNIFY_SECRET_KEY=948201938472910482910384729104 82
MONNIFY_CONTRACT_CODE=3910482910
PAYVESSEL_API_KEY=pv_live_sec_78910284729104829103 8472
PAYVESSEL_SECRET_KEY=pv_live_pub_629104829104829103 8472
PAYVESSEL_BUSINESS_ID=pv_biz_3918274
```

How to obtain Monnify credentials:

Step A: Login to https://app.monnify.com (switch from Test to Live mode).
Step B: Navigate to Developer / API Keys on the sidebar menu.
Step C: Copy your API Key, Secret Key, and Contract Code into the matching variables.
Step D: Under Webhook Settings, set the Webhook URL to: https://yourdomain.com.ng/api/webhooks/monnify

3. Application Security & App URL Variables

Protects JWT session tokens, encrypted hashes, and client-side CORS routing.

```
APP_URL=https://alaminjagoradata.com.ng
APP_SECRET=alamin_super_secret_cryptographic_key_993847291
VITE_API_BASE_URL=https://alaminjagoradata.com.ng/api
GEMINI_API_KEY=your_gemini_api_key_here (optional for smart support)
```

4. For QServers cPanel: Mapping to config.php

When running on pure PHP/Apache on QServers, edit cpanel-backend/config.php directly:

```
// Database Connection (created in cPanel > MySQL Databases)
define('DB_HOST', 'localhost');
define('DB_NAME', 'alaminja_vtu_db');
define('DB_USER', 'alaminja_dbuser');
define('DB_PASS', 'YourSecureDbPassword2026!');

// Payment & VTU Credentials (matches your .env keys)
define('CLUBKONNECT_USER_ID', 'CK10982348');
define('CLUBKONNECT_API_KEY', '9482710384729104829103847291048 2');
define('MONNIFY_API_KEY', 'MNFY_109823487192038472 9104');
define('MONNIFY_SECRET_KEY', '948201938472910482910384729104 82');
define('MONNIFY_CONTRACT_CODE', '3910482910');
define('ADMIN_SECRET_PIN', '1234'); // Change to your custom 4-digit PIN
```

5. Pre-Flight Deployment Checklist

- [ ] 1. .env file is placed in root (for Node) OR config.php is placed in public_html/api/ (for PHP).
- [ ] 2. Database schema imported via phpMyAdmin (database.sql).
- [ ] 3. Monnify/PayVessel webhook URL saved on the gateway dashboard.
- [ ] 4. Upstream ClubKonnect wallet funded with test/production balance (e.g. NGN 2,000).
- [ ] 5. Admin Secret PIN updated to a unique 4-digit number of your choice.
- [ ] 6. Test registration performed: verify that Wema/Sterling dedicated bank accounts generate.
